

Notice – New SigenStack BC cables 8m

Background

The SigenStack BC Cable connects the SigenStack Battery Controller with Sigen C&I Hybrid Inverters (HYA/HYB series), transmitting both power and communication signals between the two devices. The standard 4 m cable covers most conventional installations where the Battery Controller and inverter are placed in close proximity.

However, for installations where the devices are positioned further apart, the 4 m cable may fall short. To meet these long-distance setup requirements, we have introduced the 8 m SigenStack BC Cable, providing greater flexibility for layouts with wider spacing.

Basic information

Product Code	Product Model	Dimensions (W / D / H)	Weight	CRM Launch
11182010	SigenStack BC Cables 8m	397 / 393 / 269	23.81 kg	2026/8/30
11180009	SigenStack BC Cables 4m	397 / 393 / 184	12.75 kg	Available Now

Note: All dimensions and weight are for the Installation kit packing box.

Product introduction

The SigenStack BC Cables 8 m is an extended-length version of the standard BC cable. The kit upgrades the cable length of the **two power cables and one communication cable to 8 m**, while keeping the **same electrical specifications and connection types** as the standard 4 m version. This provides greater flexibility for installations where the SigenStack Battery Controller and Sigen hybrid inverter are positioned farther apart.
