

ABS Guard OnTop Gate

Gate element for our ABS Guard OnTop guard rail systems

Our ABS Guard OnTop Gate element provides access to a permanently-installed guard rail system - letting you easily reach a protected zone or danger zone that does not need to be accessed very frequently, such as a domed rooflight. This gate element was specially designed for our ABS Guard OnTop systems. A butterfly nut prevents the gate from accidentally being opened.

- Gate for guard rail systems
- Suitable for all ABS Guard OnTop models
